

## Environmental Policy

**M3C-POL-002**

Mercury3 Consult recognises that it has a responsibility to the environment beyond legal and regulatory requirements. We are committed to reducing our environmental impact and continually improving our environmental performance as an integral part of our Environmental Management System and Business Strategy.

We will also ensure that all our environmental policies are implemented, and all employees, suppliers and sub-contractors have a responsibility to ensure that the aims and objectives are met.

We will co-operate fully with and carry out the requirements of the Environment Agency, Local Authorities and (where applicable) Railway Regulations.

We aim to reduce the impact of our business on the Environment and to improve quality of life by careful application of the following objectives (where applicable):

- Meet all necessary legal and other requirements, in so far as they pertain to our business.
- Set Targets and Objectives against our significant aspects, so that we may reduce our impact on the environment and ensure continual improvement.
- Provide a well-structured and organised approach to site organisation.
- Clearly determine the requirements of environmental management and assign responsibilities to personnel.
- Constantly monitor environmental management aspects on site and record all environmental issues.
- Manage our projects in an environmentally sensitive manner.
- Operate a thoughtful buying policy, selecting wherever practical, alternative products, materials and services that cause less damage to the environment.
- Minimise the use of environmentally sensitive materials.
- Promote recycling of materials to reduce the use of natural resources.
- Minimise waste and reduce consumption of materials.
- Develop Environmental Standards and promote these through our business.
- Ensure compliance with regulations for noise, waste disposal and energy use.
- Communicate Environmental Policies to all our staff.
- Continual improvement of our environmental policies to all our staff.
- Continual improvement of our environmental awareness in the light of new research and developments.
- Make the contents of this policy available to contractors, subcontractors, customers, and the public.

This policy will be reviewed on an annual basis or where additional factors require action.
